## Your Path to Mastery

1. **Foundation of neural network**
   Build a solid understanding of neural networks and deep learning fundamentals.
   2 Weeks — Expand to Explore
2. **Convolutional Neural Network**
   Master image recognition and computer vision applications (CNNs).
   3 Weeks — Expand to Explore
3. **Sequence Models**
   Implement RNNs and transformers for natural language processing tasks.
   3 Weeks — Expand to Explore
4. **Capstone Project**
   Apply your skills to solve a real-world problem with industry mentorship.
   2 Weeks — Expand to Explore

4 Modules — 90-110 hours — 32 Lectures

1. **Introduction to Deep Learning** — 3-4 hours — 4 Lectures
   - What is Deep Learning?
   - Difference between AI, ML and DL
   - Applications of Deep Learning
2. **Neural Networks Basics** — 8-10 hours — 4 Lectures
3. **Training Deep Neural Networks** — 10-12 hours — 4 Lectures
4. **Convolutional Neural Networks (CNNs)** — 10-12 hours — 4 Lectures
5. **Recurrent Neural Networks (RNNs) and LSTMs** — 10-10 hours — 4 Lectures
6. **Unsupervised Learning in Deep Learning** — 12-14 hours — 4 Lectures
7. **Deep Learning with Frameworks** — 8-10 hours — 4 Lectures
8. **Deployment and Real-world Applications** — 8-10 hours — 4 Lectures
9. **Capstone Project** — 19-20 hours — 1 Activity
